

# Instructions

## Art-Nr. 5000 Inspection pit

1. These parts are not suitable for small children.
2. The product can be seen in figure 1. These instructions are part of the product. Please retain them well.
3. This inspection pit is a kind of support to work on model trains, to put down small parts and to handle some of the most used tools, like small screw drivers and tweezers. The recess allows to handle nearly every kind of work on your models. While the models are fixed safely on the inspection pit, your hands are kept free for working.
4. In figure 2 you can see different examples of application. This figure is just for illustration. The inspection pit of course is delivered without tools and models. The items shown in figure 2 are only for decoration and illustration.
5. The yellow color has been chosen because small parts put down on it can be seen and found very easily.
6. The inspection pit is very resistant against being worn down by regular use or exposition UV-rays. Anyway, do not expose it to strong heat and sun.
7. If the pit is getting dirty, you can clean it with water and a mild detergent. Do not use any strong detergent and do not scratch. The best way is to use a sponge or an old and soft toothbrush. Do not brush on the same spot for too long for this might damage the surface. You can then dry it a little with a cloth and then let the rest dry by exposure to air. Do not use hot air. You can also clean the pit with chemical alcohol, cleaning benzine or spirit. As mentioned before, do not brush too long on the same spot since this might damage the surface. If survey is getting rough, brushing time is to long. Sometimes it might happen that some persistent dirt like oil spots does not come off, in this case it is better to leave it as it is before causing any damage by trying to clean the pit too hard.
8. Like all foamed rubber, this product will be wearing off in the long run. If you recognize the development of any smeary film, a sticky surface or crumbling parts, please do not use this pit anymore since it then might damage the laquering of the models.
9. High Tech Modellbahnen manufactures its products with the greatest possible care. We issue a guarantee and warranty according to legal regulation. Should you find any new product you just bought defective, please contact your local dealer.

Now have fun with your inspection pit and always get your work done well.
